## PROFESSIONAL SUMMARY

Full Stack Developer with an Informatics Engineering degree from Universitas Pamulang, experienced in building and maintaining web applications across frontend, backend, database, and REST API layers. Contributed to an Enterprise Resource Planning (ERP) system as part of a development team and developed core content management features for a university CMS, working primarily with Laravel, Vue.js, PHP, and MySQL. Practical experience covers the full software development lifecycle, from requirement analysis and feature development through testing and issue resolution. BNSP-certified Programmer and an early-career developer motivated to keep learning and contribute to a professional development team.

## SKILLS

**Frontend:** HTML, CSS, JavaScript, Vue.js, Nuxt.js, Tailwind CSS, Bootstrap

**Backend:** PHP, Laravel

**Database:** MySQL

**Tools & DevOps:** Git, GitHub, Postman, Docker, RabbitMQ

**Soft Skills:** Problem Solving, Teamwork, Collaboration, Communication, Adaptability, Continuous Learning

## WORK EXPERIENCE

### Full Stack Developer (Internship) | CV Intect Teknologi Sejahtera

ERP Intect — Enterprise Resource Planning System (intect.id) | South Tangerang City, Banten | Mar 2026 – Jun 2026

- Contributed as part of a development team to develop and deploy an Enterprise Resource Planning (ERP) system covering Purchase Order, Inventory & Stock Movement, Assembly Order, Sales Order, and Service Ticket modules.
- Developed and integrated frontend interfaces using Laravel Blade and Vue.js components, while implementing backend logic, business processes, and database operations using Laravel and MySQL.
- Implemented Role-Based Access Control (RBAC) with 5 roles—Super Admin, Chair, Manager, Staff, and Technician—along with role-specific dashboards and access to relevant system functionalities.
- Developed 5 exportable reports, including Purchasing, Production, Inventory, Sales, and Service reports, to provide structured business information and support decision-making processes.

### Backend Developer (Internship) | PINTER — Universitas Pamulang

CMS UNPAM — Content Management System (unpam.ac.id) | South Tangerang City, Banten | May 2024 – May 2025

- Developed and implemented CMS features using Laravel and MySQL, including REST APIs, to support posts, dynamic menus, dynamic pages, and curricula across 74 units, including faculties, majors, and institutes.
- Built and supported content management workflows for 50+ published posts across multiple units, with 1.100+ total views recorded within a 7-day period.
- Implemented Role-Based Access Control (RBAC) with Admin, Structural, and Unit roles to provide role-specific access and permissions across the CMS.
- Integrated Single Sign-On (SSO) authentication with the Sasmita Group HRIS internal application to streamline user login and authentication within the CMS.

## EDUCATION

### Bachelor of Computer Science — Informatics Engineering

Universitas Pamulang | South Tangerang City, Banten | 2022 – 2026 | GPA: 3.56 / 4.00

- Focused on software and web application development, including programming, frontend and backend development, databases, system analysis and design, and software testing.
- Completed multiple academic projects covering the full development cycle, from planning and design through implementation and testing.
- Final project: developed an Enterprise Resource Planning (ERP) Information System for CV Intect Teknologi Sejahtera.

## CERTIFICATIONS & TRAINING

---

### **BNSP Certified Programmer** | Badan Nasional Sertifikasi Profesi (BNSP), Nov 2025

- National professional certification verifying competency in programming and software development.

### **TOEFL — Score 500** | TOEFL Certification, Sep 2025

- English language proficiency certification; score corresponds to a pre-intermediate proficiency level.

### **Coding Camp — Machine Learning Engineer Cohort** | Dicoding × DBS Foundation, Feb 2025

- Developed machine learning models using Python, TensorFlow, PyTorch, and Scikit-Learn, and applied data processing and analysis techniques.
- Studied MLOps and model deployment with Docker, FastAPI, and cloud computing; completed industry-oriented projects in NLP and Computer Vision.

### **Belajar Membuat Aplikasi Back-End untuk Pemula** | Dicoding, Nov 2023

- Built RESTful APIs with Node.js and Hapi, tested them with Postman, and deployed to Amazon EC2; final project: Bookshelf API with full CRUD functionality.

### **Cloud Practitioner Essentials (Belajar Dasar AWS Cloud)** | Dicoding, Nov 2023

- Covered AWS compute, storage, database, networking, security, and monitoring services, plus the AWS Well-Architected Framework.

### **Full-Stack Website Developer: Laravel, Vue.js, Nuxt.js** | BuildWithAngga, Sep 2023

- Built PowerHuman, a Human Resources Information System (HRIS), covering frontend and backend workflows and deployment via DigitalOcean and Netlify.

### **Bootcamp Front-End Developer: Mastering Vue.js 3** | BuildWithAngga, Aug 2023

- Applied Vue.js Composition API, Pinia for state management, and Axios for API integration while building a UI Kit subscription website.
